MASTER LACQUER SYSTEM

MASTER LACQUER SYSTEM

Fast drying, Easy application and Superior performance

Complete range

WOCA's Master Lacquer System is a complete solution that has been developed to meet the demands and expectations of professional wood floor finishing experts. The Master Lacquer System includes:

- Master fillers – for filling gaps between floorboards
- Master primers – to penetrate the surface and reduce side bonding before first application of lacquer
- Master lacquers – developed and optimised for various environments and requirements
- Master Cleaner and Master Care – for care and cleaning, to keep the treated surface maintained

Fast drying

WOCA Master Lacquers are quick-drying water-based lacquers, whether or not you are working with a 2K hardener. The first

coat of top lacquer should be applied when the primer has dried. Sanding and vacuum cleaning can be performed after a few hours, after which the final coat of top lacquer can be applied. The treated area can be used with caution after a short interval and will be fully-hardened for normal use after just a few days. Exact drying times will depend on the various lacquers, room temperature and air humidity. You should therefore read the instructions for application as shown on the label or in the technical data sheet.

Easy application

The lacquers feature superior flow, perfect adhesion and easy to apply with any application method, bonds nicely and are easy to apply with a roller, with no special equipment required. Master Lacquers are quick-drying and easy to sand between coats before adding the top coat.

All our lacquers are
Indoor Climate
labelled

Superior performance

WOCA Master Lacquers feature cross linking technology that produces a hard-wearing surface when compared with similar products on the market. For better results on high traffic areas, use MASTER XP-2K LACQUER or MASTER RD-2K LACQUER, which have been developed to withstand hard wear and tear in public areas, such as hallways with constant traffic.

As well as being hard-wearing, Master Lacquers are also highly resistant to chemicals. The lacquers have been tested against every imaginable type of everyday occurrence, such as spilt coffee, red wine, cola, detergents, oil, fat and can be cleaned with disinfectants.

Superior final results

The extensive range of available gloss levels, combined with a traditional, light or untreated look, ensures WOCA master lacquers have a complete solution for many different environments. The

lacquered surfaces can be kept looking great as time goes on, if the right care and cleaning products are used. Master Cleaner effectively removes dirt for everyday cleaning. Stubborn marks and stains can be removed using WOCA Intensive Wood Cleaner. Lacquered surfaces that are subject to a lot of traffic can be ruined over time because of microscopic scratches caused by small stones and dirt. This matting process can be reduced by using WOCA Master Care, which levels out the scratches and refreshes the lacquered surface treatment.

The Master Lacquer System is your guarantee of long-lasting, attractive to outstanding wooden floors remove results.

GAP FILLER - PREPARE

MASTER FILLER AQUA

Water-based gap filler for wooden floors

Master Filler Aqua is a water-based, easy-to-sand gap filler for joins, holes and cracks in wooden parquet floors in e.g. brick or herringbone patterns. The filler produces a uniform finish, is extremely easy to work with and will not crack as it is elastic and allows the wood to work.

- Easy to sand
- Water-based
- Elastic consistency
- Odour neutral

PRODUCT INFORMATION

THINNER	Water-based
COVERAGE	15-20 m ²
CONTAINER	5 L
DRYING TIME	Approx. 30-60 min
TOOLS	Stainless steel applicator

MASTER FILLER CLASSIC

Quick-drying gap filler for wooden floors

Master Filler Classic is a fast-drying solvent-based gap filler for joins and gaps in wooden floors, such as Nordic and herringbone pattern parquet. It is easy to work with and shortens the work process due to its fast drying time.

- Quick-drying
- Easy to sand
- High viscosity and flexible consistency
- Even, uniform finish
- Solvent-based

PRODUCT INFORMATION

THINNER	Solvent-based
COVERAGE	10-15 m ²
CONTAINER	5 L
DRYING TIME	Approx. 15-30 min
TOOLS	Stainless steel applicator

PRIMER - TREAT

MASTER BASE PRIMER NATURAL

Wood primer that produces a natural look

Master Base Primer, Natural is a water-based, quick-drying wood primer. The primer seals the wood and minimises tannic acid penetration and side-bonding. It is only suitable for untreated or sanded surfaces for all wood types before treatment with other water-based WOCA floor lacquers.

- Quick-drying
- Minimizes side-bonding
- Gives the wood a light colour
- Minimizes penetration of tannic acid

PRODUCT INFORMATION

THINNER	Water-based
COVERAGE	8-10 m ²
CONTAINER	5 L
DRYING TIME	1-2 hours
TOOLS	Paint roller

MASTER BASE PRIMER NORDIC WHITE / EXTRA WHITE

Wood primer that lightens the appearance of the wood

Master Base Primer is a higher viscosity water-based white pigmented primer for the first primer coat that is easy to abrade. Master Base Primer seals the wood and minimizes penetration of tannic acid and side-bonding, which means it can be used on untreated or sanded surfaces. Because Master Base Primer has a higher viscosity and rapid drying time it is an ideal base coat before coating with other water-based WOCA lacquers, compared to lower viscosity base coat primers available. Nordic White is a white variant that lightens the appearance of the wood for a more "Scandinavian" look whereas Extra White gives the floor an intensive and classic white look.

- Quick-drying
- Minimizes side-bonding
- Creates a light nordic surface

PRODUCT INFORMATION

THINNER	Water-based
COVERAGE	8-10 m ²
CONTAINER	5 L
DRYING TIME	1-2 hours
TOOLS	Paint roller

MASTER MULTI PRIMER

Improves adhesion of lacquer

Master Multi Primer is a solvent-based, fast-drying and easy-to-sand wood primer, which will seal the wood and improve the adhesion of a subsequent coat of lacquer. Master Multi Primer is especially suitable as a problem-solving primer on old and previously treated floors, as well as a primer for exotic, oily wood varieties.

- Especially suited for troublesome wooden floors
- Quick-drying
- Minimizes side-bonding
- Highlights the floor

LACQUER - TREAT

MASTER OPTIMA LACQUER

**High-end solution for domestic areas
and commercial areas with medium traffic**

Master Optima Lacquer is a fast-drying, water-based floor lacquer that has been formulated to leave wood with a durable and resistant surface. The high solids content humidifies the wood slightly, leaving the surface with a rich and full appearance. The lacquer is easy to apply and has good resistance to water and chemicals, making it ideal for offices and other commercial areas with medium traffic. This indoor climate labelled lacquer is applied in a convenient and safe way, and ensures a comfortable indoor climate afterwards".

LACQUER - TREAT

MASTER INVISIBLE 2K LACQUER

UNTREATED LOOK AND FEELING

Invisible 2K Lacquer is a high-quality water-based matt floor lacquer that has been specially developed as a lacquer when a light, untreated appearance is desired. The lacquer is based on a polyurethane binding agent, which will leave the surface with a texture resembling newly-sanded wood. The add-in hardening agent is an isocyanate-free hardener. The floor lacquer is indoor climate labelled and thus assures a good working environment during application, as well as a comfortable indoor climate afterwards.

- Modern isocyanate-free hardener gives the product a 48 hours potlife
- IBR-certified
- 2-component floor lacquer with a raw natural look
- Leaves the floor with a ultra matt look
- Fire classification according to DIN EN 13501: Bfl-s1
- Anti-slip R10

Optional:

Lighten the surface with Master Invisible White Additive

NEUTRAL LOOK

Provides the wood with a modern matt and untreated look.

INDOOR CLIMATE LABELLED

Ensures a good working environment during application. Does not harm eco indoor air quality. Water based.

EASY TO MAINTAIN

Can be cleaned and maintained with WOCA soap and care for lacquered surfaces.

LACQUER - TREAT

MASTER RD-2K LACQUER

Excellent resistance and durability for public areas

Master RD-2K Lacquer is a two-component fast-drying floor lacquer that works with an isocyanate-free cross-linking hardener. It is intended for public areas with intense heavy traffic, such as canteens and stairs, due to its exceptionally strong protection, high slip resistance and extreme resistance to black heel marks, scratches and stains. The lacquer is completely clear and preserves the light look of the wood beautifully. This indoor climate labelled lacquer is applied in a convenient and safe way, and ensures a comfortable indoor climate afterwards.

- Extreme strength and resistance
- Meets the highest standards for slip resistance
- Light Nordic look
- Isocyanate-free hardener
- Fire classification according to DIN EN 13501: Bfl-s1

RETARDER FOR LACQUERS

Prolongs the open time of lacquers

Prolongs the open time for waterbased lacquers.

- For all water based lacquers
- Easy to mix
- Extends potlife

PRODUCT INFORMATION

CONTAINER	0,1 L
MIXING RATIO	100 ml to 5 L Lacquer

UV SHIELD

Minimizes the yellowing caused by UV sun light resulting in stabilizing the natural colour of the wood

UV Shield is an additive for all WOCA-based lacquers that protects against the natural colour changes and minimizes the yellowing of the wood from sun exposure. Wood is exposed to the sun every day and with an added mix of WOCA UV Shield the uv protection is improved.

- Protects the wood against UV-light
- Reduces the yellowing of the wood
- Suitable for all WOCA water based lacquers
- Comes in UV-protectet packaging

PRODUCT INFORMATION

CONTAINER	0,1 L
MIXING RATIO	100 ml to 5 L Lacquer

REGULAR CLEANING

MASTER CLEANER

For lacquered, vinyl/LVT and laminate floors

Master Cleaner is perfect for cleaning all vinyl, laminated and lacquered surfaces. The soap effectively removes dirt and grime, as well as making the surface stronger and more resistant to liquid spillage. As the soap leaves no layer of soap, it is perfect for surfaces where frequent washing of floors is required.

- Effective care and cleaning
- Fast and easy to use
- Produces a stronger, more resistant surface
- Indoor climate labelled

PRODUCT INFORMATION

PH VALUE	8-9

TOOLS	Bucket, floor cloth or mop

OCCASIONAL CARE

MASTER CARE

For lacquered, vinyl/LVT and laminate floors

Care for your vinyl floor, laminate floor or lacquered wooden floor using WOCA Master Care. This care product smoothens small scratches, increases the resistance of the surface and provides effective protection against wear. This extends the lifetime of the surface or floor. Because Master Care does not build up a thick coating, you can use the product whenever it is required.

- Care treatment to refresh floors
- Extends the lifetime of the floor
- Protects against wear and scratches
- Easy to use
- Indoor Climate labelled
