1 LTR: 950114

4 LTR: 950115

## PREPARATION

Sweep the surface of the floor with a soft broom or dry microfibre mop to remove all loose particles and dirt.

Always shake the bottle well before use.

Multicleaner is ready to use and does not need to be diluted.

## APPLICATION

To apply Multicleaner, use the Marldon Spray Mop or a well wrung out mop, microfibre mop or clean cloth. If the floor becomes too saturated with liquid, wipe away any excess with a clean dry cloth.

Never pour water or cleaning solution directly onto wood or laminate floors, instead use a damp cloth or floor mop and remove excess liquid immediately.

Recommended for use approx. once per week or as seen necessary, dependant on the level of foot traffic and environment that the floor is located in.

### For wooden floors only

After some time the floor may become dull and tired looking, in this case, usually the day to day cleaning products have become ineffective. A stronger periodic maintenance product may be required to bring some life back to the floor.

For oiled and waxed surfaces Marldon Liquid Wax Care is recommended.

For Lacquered surfaces Marldon Refresher is recommended.

For further information on the products please see the individual technical data sheet.

Marldon Liquid Wax Care: 950058

Marldon Refresher: 650087
